Comment: Three children who left the household during 2000 (according to the panel status variable `wyrreg==3`) were wrongly coded as eligible for child interview in the interview eligibility variable (`wyrres==4`). This conclusion is based on the fact that there is valid information in the variables indicating date of departure (`wyrrm` and `wyrry`). In the table below they were manually corrected [replace `wyrres=5` if `wyrreg==3` & `!mi(wyrry)`].
 Comment: Adults are those 16 years of age and older at the end of 2000. There is one 15-year old who is interviewed as an adult and is retained in the adult file. (There is another such case, but the household has been dropped.)

COMMENT: Skill is separated according to whether the individual "Acquired needed training for present work" rather than on the professional category of the worker in order to maintain consistency with other countries using the ECHP survey. Only Belgium asks about professional category, so this information is retained as a subheading of required training.
