

On 31 October 2011, we launched a revised *LIS* template. We standardized many of the categorical variables and we slightly modified the aggregate income indicators (see [link to New LIS Data Template/ New LIS Documentation Framework](#) from the LIS Documentation page for more details). At the same time, we revised the Key Figures to reflect the revised microdata template.

Warning: We have not yet revised the data that underlie the Web Tabulator results to reflect the new microdata template. We will revise the data in the Web Tabulator by 1 April 2012!
