The Luxembourg Wealth Study Database (LWS) contains harmonised wealth microdata, from the 1990s and 2000s, from countries mainly in Europe, North America, Asia, and Australasia.

LWS includes variables on assets and debt, market and government income, household characteristics, labour market outcomes, expenditures, and behavioural indicators.

The Luxembourg Income Study Database (LIS) contains harmonised income microdata, spanning decades, from countries mainly in Europe, North America, Latin America, Asia, and Australasia.

LIS contains variables on market income, public transfers and taxes, household- and person-level characteristics, labour market outcomes, and expenditures.

The LIS mission is to enable, facilitate, promote, and conduct cross-national comparative research on socio-economic outcomes and on the institutional factors that shape those outcomes.

The main office of LIS houses the LIS and LWS Databases, and a team of professionals who perform the essential roles of the organisation: data acquisition, harmonisation, documentation, user support, and instruction.

The LIS satellite, located at The Graduate Center of The City University of New York (CUNY), is home to LIS Director Janet Gornick, Professor of Political Science and Sociology.

Lisdatacenter.org
**Who We Are**
LIS is an independent, non-profit organisation registered in Luxembourg.

**What We Do**
LIS acquires, harmonises, and documents microdata, and makes them publicly available in two databases: the Luxembourg Income Study Database (LIS) and the Luxembourg Wealth Study Database (LWS).

**How We Work**
LIS is a unique organisation with the knowledge, skills, and expertise to take months of detailed, exacting data production work off researchers’ desks, thereby enabling them to concentrate on analysing the data. How is this possible?

- Assessing income inequality
- Measuring poverty
- Comparing employment outcomes
- Analysing assets and debt
- Researching policy impacts

**Step 1.** We identify appropriate datasets
LIS assesses the quality and comparability of the original datasets.

**Step 2.** We negotiate with each data provider
LIS carries out the time-consuming work of dataset acquisition.

**Step 3.** We harmonise and document the microdata
LIS’ data experts harmonise the microdata into a common, cross-national template, and create comprehensive documentation.

**Step 4.** We double-check the harmonised microdata
Ensuring the reliability of the harmonised data is a high priority at LIS.

**Step 5.** We make the microdata available to researchers
LISSY processes microdata queries written in SAS, SPSS or Stata for users at remote locations. Registration is required.

The LIS Key Figures provide standardised national indicators on poverty, inequality, and employment outcomes. Registration is not required.

**Getting Started**
Visit the LIS website to learn more about:
- Online registration
- LISSY
- Web Tabulator
- Inequality and Poverty Key Figures
- Employment Key Figures by Gender
- Countries included in the LIS and LWS Databases
- Working Papers Series with full-text articles
- Workshops
- Self-teaching materials
- Our staff
- Funders and data providers
- How to donate

lisdatacenter.org

Board
The Board is comprised of funders, data providers, and other contributors, and follows an international, cooperative model of governance.

Directors
LIS is directed by two scholars:
Janet Gornick, Director
Markus Jäntti, Research Director

Staff
LIS’ staff is responsible for data production, IT design and maintenance, and onsite instruction and research.

Contributors
LIS is supported by a diverse group of funders and data providers. Institutions and individuals interested in contributing to LIS should contact admin@lisdatacenter.org.

Data
The LIS and LWS Databases contain variables on income, employment, household characteristics, expenditure, and wealth. The microdata are stored on a secure server and are accessible to registered users.

Documentation
Documenting the microdata, both the variable construction and the institutional context, is a crucial component of LIS’ work. Extensive documentation is available for both the LIS and LWS datasets.

Support and Opportunities
LIS provides support services and training through its annual summer workshop in Luxembourg, local workshops held in other countries, and online user support. LIS also hosts visiting scholars, interns, and pre- and postdoctoral researchers.

Scholarly Exchange
LIS is a resource for cross-national research in the social sciences, serving as a venue for international conferences and a virtual host for scholarly exchange.

Step 1.
We identify appropriate datasets
LIS assesses the quality and comparability of the original datasets.

Step 2.
We negotiate with each data provider
LIS carries out the time-consuming work of dataset acquisition.

Step 3.
We harmonise and document the microdata
LIS’ data experts harmonise the microdata into a common, cross-national template, and create comprehensive documentation.

Step 4.
We double-check the harmonised microdata
Ensuring the reliability of the harmonised data is a high priority at LIS.

Step 5.
We make the microdata available to researchers
LISSY processes microdata queries written in SAS, SPSS, or Stata for users at remote locations. Registration is required.

The Web Tabulator enables users to create tables based on the LIS datasets. Registration is required.

The LIS Key Figures provide standardised national indicators on poverty, inequality, and employment outcomes. Registration is not required.
The Luxembourg Wealth Study Database (LWS) contains harmonised wealth microdata, from the 1990s and 2000s, from countries mainly in Europe, North America, Asia, and Australasia. LWS includes variables on assets and debt, market and government income, household characteristics, labour market outcomes, expenditures, and behavioural indicators.

The Luxembourg Income Study Database (LIS) contains harmonised income microdata, spanning decades, from countries mainly in Europe, North America, Latin America, Asia, and Australasia. LIS contains variables on market income, public transfers and taxes, household- and person-level characteristics, labour market outcomes, and expenditures.

The LIS mission is to enable, facilitate, promote, and conduct cross-national comparative research on socio-economic outcomes and on the institutional factors that shape those outcomes.
