Note: The variable name is made of a prefix and a suffix; the prefix is constructed in the following way:

- the first letter refers to the level of the file (**H** for household and **P** for person)

- the second letter refers to the nature of the item (**M** for monetary, **N** for non-monetary and absence of both M and N for the total)

The suffix begins with the main letter within the block (**I, W, X, C** and **T**); any following letters refer to further subcomponents.
