Note: The variable name is made of a prefix and a suffix; the prefix is constructed in the following way:

- the first letter refers to the level of the file (**H** for household and **P** for person)

 $- the second letter refers to the nature of the item ({\bf M} \ for monetary, {\bf N} \ for non-monetary and absence of both \ M \ and \ N \ for the total)$

The suffix begins with the main letter within the block (I, W, X, C and T); any following letters refer to further subcomponents.
