Questionnaire A (dwelling unit questionnaire): roster with the list of all persons with usual residence in the dwelling, their basic demographic and social characteristics, information on sharing of expenses to determine household units and relationship of each person to the main user of the dwelling and to the head of household.	Collection mode		
The household definition is based on sharing expenditures (housekeeping concept), based on the declaration of the persons in sampled dwelling unit that they permanently live together and finance together expenditures to cover their needs. Household members include persons temporarily away if the period of actual or foreseen absence is shorter than 6 months and the person has no other private address. For persons studying away from home, the period of absence may be longer than 6 months, provided that the person has no private address and retains financial ties to thousehold members.  For couples with or without children it is always the male, regardless of his economic activity. In lone-parent families (one parent with child/children) and in non-family households (persons not related by marriage or partnership, or parent – child relationship) the first criterion for determining the head of the household was economic activity and the second criterion was income of household members. This rule was also applied in more complicated household types (for example in the case of sharing expenditures among more two-parent families).  Data quality aspects  Non-response error  The non-response rate is 16.9%. 2,297 households (out of 13,591) did not repond because of refusal, non-contact, incapacity to participate or other reasons.  Item non-response / imputation  The missing values due to item non-response and the partial unit non-response are fully imputed.  Weighting  The data provider calculated a household cross-sectional weight that corrects for the household non-response and calibrates to external data (including the inflation to total population).  Labour market information  Eligibility  Individuals aged 16 or above.  Persons are asked about the current main activity status; those not mainly working are asked whether they did any work during last week.
