	0 dwellings and
the final being the delling itself) and by areas (two different samples for the urban and rural areas). Sampling f	rame: statistica
information from population and dwelling censuses, as well as cartographic material.	
Sample size The initial sample included 22,640 dwellings (13,824 in urban areas and 8,816 in rural areas), of which 7,546 be	longed to the
panel component. The achived sample size is 21,496 households (including 88,055 individuals).	
Collection	
Collection period From January to December 2010.	
Collection mode Mainly PAPI, CAPI being partly implemented.	
Description of instruments Five questionnaires:	
1) Questionnaire ENAHO.01-condiciones de vida y de pobreza: household level questionnaire on dwelling	and household
characteristics and household consumption (food, dwelling maintenance, transport and communication, dw	elling services
leisure, entertainment and cultural services, and personal care goods and services consumed over the last mon	th, clothing and
footwear consumption and transfer expenditures over the last 3 months, furniture and household appliances, a	-
and services over the last 12 months), information on possession of durables, household members charac	-
programmes for food or nutrition support, and citizen participation;	,
2) Questionnaire ENAHO.01A-condiciones de vida y de pobreza: individual level questionnaire on education	for individual
aged 3 and above, health and employment (labour market status and income for eligible household member	
above);	is aged it and
3) Questionnaire ENAHO.01B-governabilidad, democracia y transparencia: individual level questionnaire of	governability
democracy and transparency;	governaointy
4) Questionnaire ENAHO.02-ingreso del productor agropecuario: individual level questionnaire on farming	activities (land
plots, revenues from agricultural/forestry/livestock products and subproducts and related expenditures;	activities (land
5) Questionnaire ENAHO.04-ingreso del trabajador independiente : individual level questionnaire on self-er	ipioyment non
farming activity (production/extraction, trade and services revenues and costs).	
Definitions	
Household Persons living together in the same occupied dwelling, sharing meals and caring for vital needs together, even if	non-relatives.
Household head The person recognised as such by other family members and who usually resides in the dwelling; in absence o	such a person
the head will be the major income earner and/or the person responsible of the household.	
Data quality aspects	2.025
Non-response error Out of 22,640 selected dwellings, 21,496 households were successfully interviewed (18,459 completed and	3,037 partially
completed).	
Item non-response / Almost all the income and consumption variables have been imputed. Both Partial Unit Non-Response (P	JNR) and item
imputation missings were imputed.	<u> </u>
Weighting Weights are available for the population as a whole and for the employment figures adjusted age groups. The	
correct for sampling bias, non-interview and non-response bias, and have been recalibrated according to	the population
demographic characteristics of the 2007 Population Census.
