Original survey information, *Slovenia 2012*

Generic information	Hanashald Dudest Summer (HDS) / Anhata a namehing and Jine (HDC)
Name of survey	Household Budget Survey (HBS) / Anketa o porabi v gospodinjstvih (APG)
Responsible institution	Statistical Office of the Republic of Slovenia / <i>Statistični urad RS</i> , www.stat.si
Main objective	The purpose of the HBS is to become familiar with the level and structure of personal consumption in households in whole of
Structure of data accurate	by individual socio-economic categories. The data of the survey are used to calculate weights of the consumer price index, for
	national accounts and other derivative accounts related to consumption by the population.
Structure of data source	Continuous cross-sectional survey.
Frequency	Continuous survey with quarterly and annual results.
Survey year / Wave	2012
Coverage	Whole country, all private households. The survey does not cover collective households such as boarding schools, nursin
	homes for children, old people's homes, hospitals, homes for pupils, student hostels, etc.
Sampling	
Sampling procedure	The sample frame is the Central Population register (CRP). The sample stratification was made with regard to 12 statistica
	regions and six types of settlements. The sampling is done in two stages. In the first stage sampling units were selected (mad
	up of one or more spatial districts). In the second stage six people were selected in each sampling unit. No substitution
	allowed (i.e. no selection of substitute households that would replace the ones that did not co-operate).
Sample size	7,002 households were successfully interviewed.
Collection	•
Collection period	2012. Surveying of households is equally distributed throughout the year.
Collection mode	Personal interviews (CAPI) and diaries. Since 2012, incomes are no longer collected through the questionnaire and data that
	refer to income and some other information are gathered from the existing registers and administrative records.
Description of instruments	The survey instruments consist of the following tools.
Description of instruments	 Household diary : respondents fill in daily expenditures and bought quantities during 14 days.
	- Household questionnaire: the first part of the questionnaire records the main socio-demographic characteristics of a
	household members, labour market characteristics of household members aged 15 and above as well as the main household members aged 15 and above as well as the main household members.
	characteristics of the dwelling including maintenance of housing, household equipment and housing expenditures. The secon
	part of the questionnaire records the information about all other expenditures, the consumption of goods produced by the
	household as well as information on financial well-being of the household.
	- Register and administrative sources:
	o Tax Authority – income tax,
	o Employment Service of Slovenia – unemployment benefits, financial aid,
	o Ministry of Labour, Family and Social Affairs – social benefits, family income
	o Central Population Register – marital status, country of birth
Definitions	
Household	A household is any family or other group of persons living together and sharing their income to cover the basic costs of livin
	(accommodation, food, other consumer goods, etc.), regardless of whether all members live all the time at the place where the
	household is located, or some of them live for a longer time at another place in Slovenia or abroad due to employmen
	schooling, or of any other reasons. Also, a person is considered a household who lives alone at the place of survey and has n
	other household at another place (single-person household). Such a person can live alone in a separate dwelling or together
Jousehold head	other household at another place (single-person household). Such a person can live alone in a separate dwelling or together with other persons in the same dwelling (same room) if not sharing his/her income with such persons.
Household head	other household at another place (single-person household). Such a person can live alone in a separate dwelling or together
Data quality aspects	other household at another place (single-person household). Such a person can live alone in a separate dwelling or together with other persons in the same dwelling (same room) if not sharing his/her income with such persons.
Data quality aspects Non-response error	other household at another place (single-person household). Such a person can live alone in a separate dwelling or together with other persons in the same dwelling (same room) if not sharing his/her income with such persons. The household head is deternined by the respondents during the interview
Data quality aspects Non-response error Item non-response /	other household at another place (single-person household). Such a person can live alone in a separate dwelling or together with other persons in the same dwelling (same room) if not sharing his/her income with such persons.
Data quality aspects Non-response error Item non-response / mputation	other household at another place (single-person household). Such a person can live alone in a separate dwelling or together with other persons in the same dwelling (same room) if not sharing his/her income with such persons. The household head is deternined by the respondents during the interview All missing information is fully imputed.
Data quality aspects Non-response error Item non-response /	other household at another place (single-person household).
