Household characteristics				
H SIZE	Household size	All individuals	One person Two persons Three persons Four persons Five persons or more	Number of household members. Note that the counter includes only household members, i.e. individuals who share the budget in the household. In practice, this excludes domestic servants (and family) and guests/boarders/lodgers.
H H T Y P	Household composition	All individuals	One person household Couple without children Couple with children One parent with children Other	The composition of the household with respect to the head and following the definition of family nucleus that includes married and cohabiting couples and considers only first-degree relationships between parents and children. Note that the indicator is constructed only based on household members, i.e. individuals who share the budget in the household. In practice, this excludes domestic servants (and family) and guests/boarders/lodgers.
N B C H I	Number of household members 17 or younger in household	All individuals	No child One child Two children Three children or more	Number of household members aged 17 or younger. Note that the counter includes only household members, i.e. individuals who share the budget in the household. In practice, this excludes domestic servants (and family) and guests/boarders/lodgers.
N B E L D	Number of household members 65 or older in household	All individuals	No elderly One elderly person Two elderly persons Three elderly persons or more	Number of household members aged 65 or older. Note that the counter includes only household members, i.e. individuals who share the budget in the household. In practice, this excludes domestic servants (and family) and guests/boarders/lodgers.
U R B A N	Living in rural area	All individuals	Not rural area Rural area	Indicator of residency in urban versus rural area. The classification of geographical areas into urban and rural follows the country-specific guidelines (i.e. the urban/rural classification is not based on absolute numbers across all countries, but the cutoff point changes from country to country and can change within the same country from year to year in order to retain the individual country's classifications).
H O U S E	Living in owned housing	All individuals	Owned Not owned	Indicator of housing tenure (owned/not owned). The category "Owned" includes cases in which the dwelling is owned by one or more household members, whether with outstanding mortgage or not. The category "Not owned" includes rental agreements (at market value or subsidised) as well as other rent free agreements such as employer provided housing, government/public provided housing, housing provided by others, illegal occupation.
