

**The Atlas of Inequality Aversion
Data for 56 countries 1967-2020**
Assembled by
Stanislaw Maciej Kot (Gdansk University of Technology)
Piotr Paradowski (LIS and Gdansk University of Technology)

Contact:

1. Stanislaw Maciej Kot, skot@zie.pg.gda.pl Gdansk University of Technology, Department of Statistics and Econometrics, Narutowicza 11/12; 80-233 Gdańsk, Poland
2. Piotr Paradowski, paradowski@lisdatacenter.org LIS, Maison des Sciences Humaines, 11, porte des Sciences, L-4366 Esch-Belval, Luxembourg

Description:

This database contains the country-specific estimates of inequality aversion, Atkinson index, equally distributed equivalent income, and the GB2 distribution parameters. The database is an updated version of estimates that Stanislaw Maciej Kot and Piotr Paradowski initially presented in [LIS Working Paper 826](#) (forthcoming in *Equilibrium. Quarterly Journal of Economics and Economic Policy*). The database now contains parameters estimated for 664 data points for 56 countries dating as far back as the late 1960s. The sole parameter ε of the *constant relative inequality aversion utility function* (Atkinson, 1970) expresses a society's aversion to inequality and is derived from the mathematical condition of the existence of the social welfare function estimated from a parametric distribution of income ($GB2(a,b,p,q)$). The authors call it the *Atlas of Inequality Aversion* parameters. It is the first such database that allows researchers not only from the field of welfare economics but also in other social science disciplines to obtain inequality aversions that they can use in various ways to benefit their scientific investigations.

Understanding the threshold of a population's tolerance to inequality can also help steer economic policy decision-making.

We ask that users of this database to cite it as

Kot, S.M. and P.R. Paradowski (2022). The Atlas of Inequality Aversion, <https://www.lisdatacenter.org/resources/other-databases/>.

and

Kot, S.M. and P.R. Paradowski (2022). *The atlas of inequality aversion: theory and empirical evidence from the Luxembourg Income Study database*. (LIS Working Paper 826). Luxembourg: LIS. <https://www.lisdatacenter.org/wps/liswps/826.pdf>. Forthcoming in *Equilibrium. Quarterly Journal of Economics and Economic Policy*

The data is available for download in Stata and CSV formats. The Stata file includes variable labels as well as data and variable notes (see codebook below).

Codebook:

. notes

_dta:

1. incomes are expressed in International PPP adjusted and constant 2017 prices, except for Taiwan and Sweden 1967.

database:

1. LIS* denotes 3 French datasets (household budget surveys, fr78, fr89, and fr94) that have been removed from LISSY but are available for analysis upon request; please get in touch with usersupport@lisdatacenter.org

Tables:

The numbering of the tables below corresponds to the numbers as they appear in a forthcoming publication in *Equilibrium. Quarterly Journal of Economics and Economic Policy* (2022), 17(2). Please note that the number of LIS datasets increases four times per year as new datasets are added to the Luxembourg Income Study (LIS) Database. Therefore, the tables below contain more data points for the estimated parameters compared to the forthcoming publication. The tables contents are also available for download in Stata and CSV formats.

Table 2. Estimates of the parameters of the Generalised Beta of the second kind [GB2(a,b,p,q)] distribution (standard errors are under estimates).

Notes: symbol N denotes the number of household members

Source: Author's calculations using data on disposable household incomes from the LIS database, adjusted by the equivalence scale of the form of the square root of the household size.

Table 4. Estimates of inequality aversion ε and related characteristics (June 2022)

Notes:

LB, LU- lower and upper boundaries of 95% confidence interval of $\hat{\varepsilon}$

Atk- the Atkinson index $A(\varepsilon, \mu)$, where μ is the mean of GB2 estimates

$D[\hat{\varepsilon}]$ - the standard errors of the estimator $\hat{\varepsilon}$, Eqs. (19-22)

EDEI - the equally distributed equivalent income

Source: Authors' calculations using data from Table 2
